

Free Space Green Functions
of LPDEs through
Integral Transform Techniques

AVOY JANA

November 6, 2024

Contents

Introduction	1
1 Fourier Transform	3
2 Complex Integration	5
3 Laplace Transform	7
3.1 Theorems	7
3.2 Definition of LT and ILT in Table of Integral Transform (Vol. I) by A. Erdelyi	11
4 Mathematical Functions	13
4.1 Bessel Functions	13
4.2 Dirac Delta and Heaviside Theta Functions	16
4.3 Non-Elementary Functions	17
5 Branch Cut Techniques	18
6 Equation of Motions and Electrical Circuits	19
6.1 Two Component Circuit	19
6.2 Constant Force Motion	21
6.3 Drag Force Motion	23
6.4 Oscillatory Motion	25
6.5 Damped/Forced Oscillatory Motion	27
7 Laplace/ Poisson Equation	33
7.1 1D Laplace Equation	33
7.2 2D Laplace equation	33
7.2.1 Vectorial Treatment	33
7.2.2 Component wise Treatment	37
7.3 3D Laplace Equation	40
7.3.1 Vectorial Treatment	40
7.3.2 Component wise Treatment	42
8 Helmholtz Equation	45
8.1 1D Helmholtz Equation	45
8.2 2D Helmholtz Equation	49

8.2.1	Vectorial Treatment	49
8.2.2	Component wise Treatment	54
8.3	3D Helmholtz Equation	62
8.3.1	Vectorial Treatment	62
8.3.2	Component wise Treatment	63
9	Modified Helmholtz Equation	67
9.1	1D Modified Helmholtz Equation	67
9.2	2D Modified Helmholtz Equation	68
9.2.1	Vectorial Treatment	68
9.2.2	Component wise Treatment	71
9.3	3D Modified Helmholtz Equation	72
9.3.1	Vectorial Treatment	72
9.3.2	Component wise Treatment	74
10	Diffusion/Heat Equation & Thermal Wave Equation	79
10.1	1D Diffusion Equation	83
10.1.1	Impulsive Source	83
10.1.2	Time-Harmonic Source : Thermal Wave Equation	95
10.2	2D Diffusion Equation	100
10.2.1	Impulsive Source : Vectorial Treatment	100
10.2.2	Impulsive Source : Component wise Treatment	108
10.2.3	Time-Harmonic Source : Thermal Wave Equation	108
10.3	3D Diffusion Equation	112
10.3.1	Impulsive Source : Vectorial Treatment	112
10.3.2	Impulsive Source : Component wise Treatment	119
10.3.3	Time-Harmonic Source : Thermal Wave Equation	120
11	Fokker Planck Equation	125
11.1	Impulsive Source	126
12	Wave Equation	127
12.1	1D Wave Equation	127
12.1.1	Impulsive Source	127
12.1.2	Time-Harmonic Source	133
12.2	2D Wave Equation	135
12.2.1	Impulsive Source	135
12.2.2	Time Harmonic source	143
12.3	3D Wave Equation	144
12.3.1	Impulsive source	144
12.3.2	Time Harmonic source	150
13	Klein Gordon Equation	154
13.1	1D Klein Gordon Equation	154
13.1.1	Impulsive source	154
13.2	2D Klein Gordon Equation	159

13.2.1	Impulsive source	159
13.3	3D Klein Gordon Equation	166
13.3.1	Impulsive source	166
13.4	LL. G. Chambers' Technique	170
13.4.1	1D case	172
13.4.2	2D case	173
13.4.3	3D case	174
13.5	Tachyonic Klein-Gordon Equation	175
14	Relativistic Heat/Telegrapher Equation	177
14.1	1D Telegrapher Equation	177
14.1.1	Impulsive Source	177
14.2	2D Telegrapher Equation	183
14.2.1	Impulsive Source	183
14.3	Intermediate Substitution	184
15	Dissipative Klein Gordon Equation	186
16	Multi-dimensional Green function	187
16.1	Laplace, Helmholtz and modified Helmholtz equation	187
16.2	Diffusion equation	194
16.3	Wave equation	197
17	Hankel Transform & Radially symmetric Green Function	200
17.1	Hankel Transform	200
17.2	Radial Diffusion Equation in Polar Co-ordinate	205
17.3	Axis-symmetric Diffusion Equation in Cylindrical Co-ordinates	207
17.4	Spherical Bessel Transform	208
17.5	Radial Diffusion Equation in Spherical Polar Co-ordinate	212
18	Green Function of Bi-harmonic Equations	214
19	Green Function of Vector Operators	215
19.1	DBAR Operator	215
19.2	Divergence Operator	215
19.3	Curl Operator	215
19.4	Curl of Curl operator	216
19.4.1	Static Source	216
20	Application of Green Function in Physics	219
20.1	Solution of LPDE	219
20.2	Quantum Mechanical Scattering	219
20.3	Propagator in Quantum Field Theory	219
20.4	Electromagnetism	219
20.5	Fourier Optics	219
